THE Herald may yet find itself in that "awkward position" against which it so kindly warned the TRIBUNE before the convention. That position was one in which it was suggested this paper might be giving unequal support to the nominees of the Republican party. With a good clear conscience we are whooping it up for every man. But we are pained with the attitude of the Herald. This week it advocates a compromise with the Home Rulers as to Supervisors, naming Lambert as the particular Republican candidate whom it desires to have elected. Four to one is a pretty big concession to make at this stage in the game, by a paper that preached a straight ticket before the convention only.

THE TRIBUNE had a hard time of it getting the ticket in "straight" last week but all the kinks were oversights owing to the hurry and excitement of convention week. The name of C. A. Stobie for treasurer one of the best vote pullers on the ticket was omitted and the initials of one of the supervisors went in wrong. As hurried and rubbed down this week the ticket looks better than ever. The voter who feels that he can do better than support the whole ticket from top to bottom is the victim of false logic. The Republican ticket is the good government ticket.

AT any rate, Secretary Carter's scheme to capture endorsements from all the County conventions in the Territory failed with remarkable emphasis. None but the County of West Hawaii took the sly bait. Oahu, Maui, Kauai and East Hawaii were not in the gubernatorial business at this time.

THE bolt of J. H. Boyd and Curtis Iaukea at Honolulu from the Republican party enables us to felicitate ourselves on account of the cohesive quality of the Big Island brand.

NOW THAT Carter has launched his gubernatorial boomlet, we should soon hear from the other three or four sides at Honolulu.

Carter a Candidate.

Honolulu, Sept. 21.—Clarence L. Crabbe, when seen this morning regarding his letter to Hilo and District Committeemen of other counties, readily acknowledged the authorship of the letters, also that the letters were purely, personal as far as he was concerned and not the result of any action by the Republican Central Committee, of which Mr. Crabbe is chairman.

"I have nothing to say further," said Mr. Crabbe.

"Is your letter to indicate that Mr. Carter is out for the Governorship and his campaign is begun?" he was asked.

"Certainly, Mr. Carter is a candidate and the work is on."

Good Rules For Use in the War Against Mosquitoes.

Mosquitoes breed only in water; usually fresh, standing water in artificial places.

Mosquitoes occur in the vicinity in which they breed. Invasions from long distances are exceptional. The young mosquito or "wriggler" lives in water at least 10 or 12 days.

Although the wrigglers live in water they must come frequently to the surface to breathe.

Coal oil on the surface of the water prevents the wriggler from breathing.

Destroy the breeding places and you will destroy the mosquitoes.

Empty the water from all tubs, buckets, cans, flower pots, vases, etc., once a week.

Fill in or drain all pools, ditches, and various excavations, as post holes left unfilled, etc.

Change regularly every week all water needed in chicken coops, kennels, etc.

Treat with coal oil all standing water which cannot be screened or drained (1 oz. oil will cover 15 square feet of surface). The oil does not affect the water for use if the water is drawn from below.

Put wire netting over cisterns, wells and tanks of water in every day use.

Places in which it is undesirable to place oil, such as watering troughs for stock, lily ponds, etc., can be kept free of the wrigglers by putting in gold fish. The nymphs of dragon flies and tadpoles of frogs also feed on the wrigglers.

See that the plumbing about the place is in perfect order. Prevent leakage of pipes or clogging of eaves.

Inspect all cesspools and see that the covers are absolutely tight.

Clean away all weeds, grass and bushes about ditches, ponds and other possible breeding places, since these afford a hiding place for the adult mosquitoes.

Clean up vacant lots and back yards of all cans, tins, bottles and rubbish.

First do away with or treat all places where mosquitoes are known to breed, and then begin work on places where they MIGHT breed.

As a citizen of your community you should feel a personal responsibility for the destruction of the mosquitoes in your district, and seek to co-operate with your neighbors in the work of doing away with breeding places. Inspect and treat with coal oil gutters, culverts, ditches, man-holes, catch-basins, etc., along the roadside. Mah-hole covers should be screened.

Where oil is applied to standing water it must be distributed evenly over the surface. Use a hand syringe, or, if the area is great, a knapsack sprayer.

Houses should be cleared of all winged mosquitoes by the burning of insect powder. The mosquitoes will fall to the floor and should be collected and burned.

Relief in any community or district depends entirely upon the co-operation of the members of the community.

BIG SUGAR CARRIERS.

Two Years' Contract Signed With the American-Hawaiian Line.

Honolulu, Sept. 17.—The American-Hawaiian Steamship Co. has recently made an agreement by which its ships will carry Hawaiian sugar around the Horn for at least two years to come. The agreement was signed in New York just a short time ago by representatives of the planters and the steamship agents.

Under the new contract the American-Hawaiian freighters will handle all the sugar that can be carried with the tonnage at the disposal of the island trade. The freighters will take about 105,000 tons of sugar around the Horn next year and the planters are now chartering sailing vessels to take the balance.

All of the sugar agents are included in the two years' contract, as follows: H. Hackfeld & Co., T. H. Davies & Co., Alexander & Baldwin, C. Brewer & Co., Castle & Cooke, F. A. Schaefer & Co.,

M. S. Grimbaum & Co., and Henry Waterhouse Trust Co.

The contract calls for the handling of the crops of 1904 and 1905, the planters agreeing to furnish sugar for as many steamers as the American-Hawaiian Steamship can place in these waters. It is estimated that 105,000 tons of sugar will be handled by the freighters during the season of 1904. The total balance of the crop, nearly 300,000 tons, will be handled by the sailing fleet excepting about 80,000 tons which will be shipped direct to San Francisco by freighters. The sugar agents are now chartering sailing vessels to handle the remainder of the crop.

The first of the freighters to take part of the new crop will probably be the Hawaii which is due to arrive in December.
